2018/06/19

INAUGURATION OF THE ECONOMICK PROTOTYPE INTERMITTENT KILN

The prototype inauguration event will take place on 19 June 2018 from 9.30 a.m. in Via Einstein, in Kerasan Ceramics plant, in industrial area of Civita Castellana.

PROGRAM

- Welcome greeting by Eng. Antonio Fortuna
- Guided tour of the Kerasan plant, accompanied by Dr. Gianluca Andorno, inauguration of the prototype with local and provincial authority intervention.
- Presentation of the first results obtained in the meeting room of Palazzo Fortuna, in the center of Civita Castellana, in Via Garibaldi no. 23 and subsequent buffet lunch.

The intermittent kiln, installed at the Kerasan plant, has been specifically designed and built to obtain significant energy savings in ceramic firing as well as a reduction in methane and other pollutants emissions.

Suitable for a wide range of ceramic applications and sectors, ECONOMICK kiln will help the European ceramic companies to boost their environmental and economic sustainability of the.

The project has been realized thanks to the collaboration of several ceramic companies in the Viterbo area and beyond.
